

Drift Cutter Kit Installation Instructions

Tools Required: One 7/16" wrench or ratchet

Attach the kit to the #1 pole (the pole attached to the head of the Roof Razor®) pointing away from the slide about 4 inches behind the front of the headframe as seen in Figure 1. Attach using the two U-bolts and nuts with a 7/16 inch wrench or ratchet as seen in Figure 2. Make sure that the nuts are tight to prevent drift cutter from rotating during use.

Figure 1

Figure 2

CAUTION

Do not overtighten nuts this will crush the pole, which may effect pole strength.
